Atempo Live Navigator Server

	Operating System	Platform
ALN server for Linux	Red Hat Linux, SuSe, Cent OS	x64 kernel 2.6.18 and above
ALN server for Windows	Windows Server 2003 Windows Server 2003 R2	x64
	Windows Server 2008 Windows Server 2008 R2	x64

Atempo Live Navigator Agent

	Operating System	Platform
ALN agent for Windows	Windows XP	x86
	Vista Windows 7	x86 / x64
	Windows 2003 Windows 2003 R2	x86 / x64
	Windows 2008 Windows 2008 R2	x64

Co-residence with other Atempo Products

It is generally safe to install components from other Atempo products on the same host as Live Navigator, provided the host has sufficient processor, memory, storage, and network resources to support the combined load and the product versions are at least as current as the following:

Atempo Product	Supported Version (*)
Atempo Time Navigator (ATN)	ATN 4.2 (and above)
Atempo HyperStream Server (HSS)	HSS 2.1 SP2 When ALN and HSS share the same Block Repository, replication and mirroring options are not supported for HSS
Atempo Digital Archive (ADA)	ADA 2.3 (and above)
Atempo Digital Archive for Messaging (ADAM)	ADAM 2.2 (and above)

* Recommended Best Practices

Running multiple product components on the same host **is not recommended** in production environments. Like any business-critical application, Atempo products will perform best when run on dedicated hosts. Furthermore, troubleshooting issues with co-resident applications can be extremely complex, which may result in reduced service level.

This section refers only to co-residence and not to interoperability with other Atempo products (excepted for HyperStream Server that can share the same ABR – Atempo Block Repository-).

It is highly recommended that ***ALN Server be installed on a dedicated host and provisioned with a dedicated storage***

When it is absolutely necessary that Atempo Live Navigator and other Atempo products are coninstalled, one must strictly adhere to the resource requirement outlined as follows. Where multiple Atempo product server components share a host, the ***network, system, and storage resource requirements*** are ***strictly additive***. For example, if ALN server requires X resources and ATN server requires Y resources, then the combination requires X+Y resources.

If you require assistance or additional information, please contact Atempo Support.

Certified Compatible Applications

	Vendor	Software Application
ALN Agent	Microsoft	Office: 2000, 2003, XP, 2007, 2010
	Microsoft	EFS, BitLocker

For information on Atempo Live Backup compatibility with specific disk and content encryption software, please contact our Customer Support team at support@atempo.com

Compatible Browsers

	Software Application	Version
ALN Administration Console	Internet Explorer (*)	version 8 and higher
	Firefox (*)	version 3.6 and higher
	Safari (*)	version 5 and higher
	Google Chrome (*)	version 8 and higher

*: equipped with at least version 10.1 of Adobe Flash Player
